About the Maryland Bioenergy Center

Located in the heart of the Maryland Food Center, the Maryland Bioenergy Center is the state's leading organics recycling facility. Here, surplus food and organic waste from local manufacturers and retailers are transformed into clean, renewable energy and nutrient-rich soil products.

In 2024 amount of greenhouse gases we avoided by diverting food waste from landfills and instead recycling at the Maryland Bioenergy Center is equivalent to:

10,674

Gas cars driven for
one year

2,310

Garbage trucks of waste
recycled vs landfilled

9,537

Homes' electricity use
for one year

315

Acres of soil conditioner
produced to grow food
