

## Turning food waste into renewable energy and healthy soils

BTS Bioenergy's Maryland Bioenergy Center (MBC) provides sustainable recycling solutions for commercial food waste and organic residuals. We help food manufacturers, processors, distributors, retailers, and food service companies divert material from landfills while reducing disposal costs and supporting sustainability goals.

MBC accepts bulk liquid organics delivered in tank trucks and source-separated food waste delivered in collection vehicles.

### ✓ WHAT WE ACCEPT

- All food waste including meat, poultry, seafood, dairy, produce, breads, pasta, dough, pet food, and food grade ingredients
- Bulk liquid organics in tanker trucks, including syrups and other food byproducts
- Fats, oils, and grease (FOG) including grease trap material, biodiesel byproducts, and used cooking oil
- Food processing by-products including wastewater residuals and other facility effluents

### INDUSTRIES SERVED

- Food manufacturers
- Food distributors
- Food service companies
- Universities and school systems
- Institutions with cafeterias
- Stadiums
- Grocery Stores
- Convention centers
